Green Energy
Trading

When to use this form

About Green Energy Trading (ABN 21 128 476 406)

Green Energy Trading is a leading environmental certificate agent, financier and clean energy market advocate. We make clean energy options more accessible to Australians by facilitating access to financial incentives and affordable finance options.

When to use this form

The solar or energy efficiency installation recently undertaken by your organisation may be eligible to create Small-scale Technology Certificates (STCs) or access other environmental scheme incentives. These benefits are typically incorporated into your project price, and dramatically reduce the upfront cost.

Access to these incentives is governed by the Clean Energy Regulator (Renewable Energy Target), the Independent Pricing and Regulatory Tribunal (IPART) (NSW Energy Savings Scheme) and the Essential Services Commission (Victorian Energy Efficiency Target). To ensure the robustness of the schemes, Green Energy Trading, the regulators or their authorised representatives may: request site access to complete safety and compliance inspections, carry out phone audits or perform document checks.

Our processes require confirmation that the system has been installed and commissioned. This document provides assurance that your installation has been completed to your satisfaction.

For more information

For general information regarding environmental scheme benefits, please visit our website greenenergytrading.com.au. Alternatively, call our friendly staff on 1300 077 784. We will be happy to assist.

Customer agreement

I hereby declare that:

- The solar and/or energy efficient equipment has been installed and commissioned for the site detailed below.
- I will make all reasonable endeavours to accommodate any inspections or requests for information from Green Energy Trading, the Clean Energy Regulator, the Independent Pricing and Regulatory Tribunal or the Essential Services Commission or their duly authorised representatives.
- I understand that I have received an identifiable benefit for the environmental certificates (e.g. STCs, ESCs or VEECs) created from this installation and will not attempt to sell, assign or create these certificates at any time.
