1	Sanden Call Out & Fault Diagnosis	San_CallOut	2x Site Visits by our installers to investigate E040 error code. Attended site found error message displayed on screen E040. System bled, found no air present. Taps inside checked, customer said it sounded like air but installer believes sounded more like a flow restriction than air. Installer removed five strainers from system including on the temp valve. Found all strainers to be badly blocked with calcification. Reinstalled strainers and bled the lines again. Tested and found the system to be functioning correctly now. Customer showed photos of a strainer that was removed in December that was clear, with conclusions that all the sediment has only blocked the strainers in the past month or so. Informed the customer that the cartridge for the inlet filter is due for replacement also.	\$270.00	\$270.00

Sub Total \$270.00

GST 10% \$27.00

Grand Total \$297.00
